- (b) In the event of a breach of sub-clause (a) above, the Government will be entitled to immediately remove and dispose of any such commodities or things in such manner as the Government may see fit without compensation to any party. Lighting and Electricity

36. Illumination facilities will be provided in the Venue. No artificial lighting other than electrical lighting may be used by the Licensee.
37. The Licensee may use batteries to supply electricity for the Licence Area.
38. The Licensee may at his own costs arrange for electrical installation works for temporary supply of electricity from the power company to the Licence Area. In making such arrangement, the Licensee must comply with the following requirements –
- (a) Any electrical installation works for temporary supply of electricity to the Licence Area must be carried out by the electrical contractor designated by the FEHD. If there is no

designated contractor of the FEHD, the works must be carried out by a registered electrical contractor.

- (b) The electricity supply installation must be made in an area set aside for the purpose within the Venue.
- (c) The electrical installations must comply with the requirements in the Electricity (Wiring) Regulations (Cap. 406E).

Non-compliance with any of the above requirements will result in disconnection or termination of power supply to the Licence Area.

- 39. The FEHD may require the Licensee to disconnect any equipment in possession by the Licensee from the electricity power supply system if there is proof or reasonable suspicion that there is electricity leakage or overloading of the equipment (e.g. tripping of the electricity power supply system). Failure to do so will result in disconnection or termination of electricity power supply to the Licence Area. The electricity power supply to the Licence Area will be resumed or re-connected only after the Licensee has demonstrated to the satisfaction of the Electrical and Mechanical Services Department (e.g. conduct test by a registered electrical worker) that the equipment will not cause any electricity leakage or overloading.
- 40. The Licensee will be held fully responsible for any accident or fire incident arising from any electrical installations due to the negligence of the Licensee or his employees or agents.
- 41. The FEHD may impose any other requirements for the safe operation of the electricity supply system.
- 42. The FEHD may restrict the maximum electric current measured in ampere to be provided to the Licence Area and the level of restriction may be changed from time to time during the Licence Period. The Licensee must observe such restriction and should take the restriction into consideration before the electrical installation works are carried out.
