

**CONTROLLING OFFICER'S REPLY**

**EEB(F)084**

**(Question Serial No. 1990)**

Head: (49) Food and Environmental Hygiene Department

Subhead (No. & title): (-) Not specified

Programme: (2) Environmental Hygiene and Related Services

Controlling Officer: Director of Food and Environmental Hygiene (Ms Irene YOUNG)

Director of Bureau: Secretary for Environment and Ecology

Question:

It is mentioned under the Programme that the Department will expedite the refurbishment or facelifting projects of public toilets under the Enhanced Public Toilet Refurbishment Programme. In this connection, please advise this Committee of:

1. the total number of public toilets refurbished or facelifted since the commencement of the Programme and the related expenditure as per the table below:

No.	District	Name of public toilet	Type of works (refurbishment/ facelifting)	Completion date	Actual expenditure

2. the projected number of public toilets to be refurbished in the coming year, and the expected completion date for the refurbishment of all public toilets in the territory; and
3. whether the Department has considered increasing the resting rooms for cleansing workers in planning the refurbishment or facelifting of public toilets, given that there are some views of local communities that only the user experience rather than the interests of cleansing workers are focused in refurbishing public toilets. If yes, what are the details? If no, what is/are the reason(s)?

Asked by: Hon CHENG Wing-shun, Vincent (LegCo internal reference no.: 17)

Reply:

1. The Food and Environmental Hygiene Department has actively promoted the Enhanced Public Toilet Refurbishment Programme since 2019-20. As at 31 December 2022, refurbishment or facelifting projects for over 190 public toilets have been rolled out. The details are set out at **Annex**.
2. The works for over 60 public toilets will commence in 2023-24, bringing the total number of public toilets refurbished or facelifted under the five-year Programme to over

250. Apart from ensuring the timely completion of the ongoing projects under the Programme, the Department will advance the planning of the works for the next stage. Besides, the Department will compress the project time by adopting technologies such as the Modular Integrated Construction method and Design for Manufacture and Assembly as far as practicable. The aim is to progressively commence the relevant works for the remaining 430 public toilets or so yet to be refurbished or facelifted in the territory between 2024 and 2028.

3. During refurbishment, the Department will provide attendant rooms for public toilets with toilet attendant service if circumstances permit. To improve the working environment of toilet attendants, wall-mounted fans, mechanical ventilation, power sockets, lighting and storage facilities will also be provided in the attendant rooms. As at 31 December 2022, about 90% of the public toilets with attendant service were provided with attendant rooms.
